

Construction Updates – Getting to and from PIE Airport and Terminal Improvements

Roadway Reconfigurations- Roosevelt Blvd. and Ulmerton Road

A major Department of Transportation (DOT) road construction project which impacts travel to and from PIE is underway as preparations are underway for the Gateway Express Project. Only one lane traveling west on Roosevelt to the airport is open and only one lane traveling east on Roosevelt to get to Ulmerton Road is open (the Roosevelt overpass connection to Ulmerton has been demolished). Travelers must make a left hand turn at a traffic light from one single lane to proceed east on Ulmerton. Connecting to Ulmerton Road from 49th Street is an option.

These changes create delays and travelers are urged to plan for the extra time needed. According to FDOT, this road configuration will be in effect until late January 2017. According to DOT, "...When complete, the new at-grade intersection will include two left turns lanes from southbound Roosevelt to eastbound Ulmerton. This reconfiguration is in preparation for the upcoming Gateway project which will build a new elevated controlled access roadway that connects U.S. 19 and the Bayside Bridge to I-275 in central Pinellas County."

PIE Terminal Renovations

Inside the airport, renovations are underway. We are expanding our TSA checkpoints adding TSA Pre✓ lanes, increasing our passenger screening. The major portion of our renovations will be in Gates 7-10 as we expand this departure area by 12,000 square feet to accommodate our passengers. With a new gate added, Gates 7-11 will have new food & beverage and news & gifts concessions, new restrooms, and a children's play area. The 15 month project is expected to be completed in June 2017.
