St. Pete-Clearwater International (PIE) Opens Mom's Privacy Room for nursing/pumping and special needs passengers

St. Pete-Clearwater Int'l Airport has opened its first Privacy Room for Mom's in Gates 2-6 Post Security. Located next to the restrooms, the room has a comfortable recliner, table, electrical outlet, sanitary wipes, a bench for additional family seating, and a few toys to keep children entertained. The room is operated by calling a number for a secure access code.

The room was designed and built by airport staff and is an important amenity for our traveling moms. Airport Director Tom Jewsbury stated, "We wanted to offer a comfortable and private space for our moms and passengers with special needs. Next year, we will add another room in Gates 7-10 when our terminal renovation project is completed."
