### St. Pete-Clearwater International Airport (PIE) Parking and Roadway Impacts – August 2019

The airport's Parking and Roadway Construction Project is entering a new phase with additional impacts to customers. This project, in conjunction with the **Gateway Express Project\* by the Florida Department of Transportation**, impacts the airport's customers. Please note the following key impacts for this phase of the project:

- Utility work along our Terminal curbside will close portions of our sidewalks in phases. Pick-up and drop-off of passengers will be impacted with changes to the normal traffic patterns within the airport roadways. Active loading and unloading curbside will be strictly enforced.
- Our Ground Transportation Lot reopens for Taxis, Hotel and Off-site Rental Car shuttles, and our Economy Parking Lot Shuttle.
- A new permanent entrance to Long-term parking is now open and will minimize traffic congestion in front of the terminal.
- PIE's Short-term Parking Lot remains closed during this project phase.
- New ADA Parking open closer to Terminal.
- **Please plan extra travel time to accommodate construction in and around the airport. We apologize for the inconvenience.** Parking Lot shuttles may have longer wait and route times to get to/from economy parking lots to the terminal. Visitors are encouraged to use the cell phone lot for awaiting passenger pick-up or the long-term parking lot. For airport information, call 727-453-7800.
